Hiring Manager
Pawa IT Solutions
Nairobi, Kenya

Dear Hiring Manager,

I am writing to express my interest in the Full Stack Software Engineer position at Pawa IT Solutions. With a Bachelor's degree in Software Development from KCA University and professional experience developing scalable applications using Laravel, Vue.js, and AWS, I am confident in my ability to contribute meaningfully to your innovative team.

In my role as a Full-Stack Engineer at Green Bank Credit, I built responsive and user-centric web platforms that improved customer experience and streamlined operations. Prior to that, I developed mobile solutions at Galaxies Coders, including a fully functional Android-based POS system, and participated in collaborative software development at EarthView Management Limited, where I honed my skills in testing and debugging.

What sets me apart is my versatility across the tech stack, from backend development using Laravel and MYSQL to front-end interfaces built with React and Vue.js. I am also proficient in managing APIs. Beyond my technical abilities, I am a passionate team player with strong communication skills.

I am excited about the opportunity to work at Pawa IT Solutions, a company that values technology-driven impact. I am confident my dedication to clean code, collaborative problem-solving, and user-focused development aligns with your mission.

Thank you for considering my application. I look forward to the opportunity to further discuss how I can add value to your team.

Sincerely,
Victoria Ndulu Muithya
